SUMMARY

A self-motivated and ambitious IT professional with high-level proficiency in web development seeks to establish a career as the Web Developer. I've spent many hours learning and practicing web development skills besides my college courses. I'm keen to work, contribute to the company and learn new skills, especially I'd like to learn Angular, Vue, Java. The most desirable position for me would be a React developer or MERN stack developer but I'm open to any web developer position.

SKILLS

HTML5, CSS3, SASS, JavaScript, TypeScript, React, Redux, Node.js, Express.js, MongoDB, PostgreSQL, MySQL, Git.

PROJECTS

RECIPES APP

MONGODB | EXPRESS.JS | REACT.JS | NODE.JS | AWS S3

- **Social Media** to share recipes with world.
- Each user has **profile** where can **create, delete, edit** recipes. Users able to **like**, leave a **comment** on recipes and **follow** other users.
